RE : PHYTOBERRIES PRODUCT - Formulation Improvement & Upgrade

We are glad to inform all doctors, patients & buyers worldwide that PHYTOBERRIES's formulation has been improved and upgraded. The strengthening of PHYTOBERRIES's formulation has been implemented to keep our product abreast with the increased challenges in modern inflammatory and degenerative diseases.

The new PHYTOBERRIES formulation contains approximately 25% more berry seeds, flesh, rind & puree compared to the older version. Consequently the serving size will have to be increased slightly from 4 grams per serving to 5 grams per serving to accomodate the increased use of these important active ingredients.

We thank you for your loyal support all these years and will strive to provide doctors and patients with the best & most updated antioxidant formulation to meet the everchanging development in the field of inflammatory and degenerative diseases.

Yours Sincerely

A handwritten signature in black ink, appearing to read "Bernard Low", is placed above the printed name.
